

MODEX GENAI - DAY 1 :

OBSERVATION . Md :

1. I tested three Different types of Prompts using the Gemini model.
2. I understand that How generative AI Responds Different to the Prompt given.

1. FACTUAL PROMPT :

I asked a Factual Question :

"What is the capital of Australia"?

The model answered :

"The capital of Australia is Canberra"

From this I observed that the model gives short and accurate answer for simple Factual Question. It did not add any extra unnecessary Details.

I LEARNED :

1. Factual Prompt → Direct answer
2. clear Questions Produce accurate Responses.

CREATIVE PROMPT:

1. By asking the model to generate a short Poem we tested its creativity.
2. the creative & meaningful response is given.
3. It use Rhyming words and created a small coding related story around Debugging error.

I OBSERVED:

1. It create a content like Human.
2. the output is Not Robotic it's felt natural.

LEARNED:

The Generative AI is not only For answer to the Question But also For creates task.

SUMMARIZATION PROMPT:

1. How I gave a long Paragraph to it and ask to summarize it to the model.

2. the Paragraph is about Internet

1. History of the Internet

2. Impact in global.

these are the output it gave.

I OBSERVED :

1. LLM are used to save time By summarizing large amount of text into small information.
2. Remove unnecessary Details
3. the summary was short and easy to understand.

I LEARNED :

How LLMS are used to save time .

OVERALL CONCLUSION :

1. Different Prompt Produce Different types of output .
2. Prompt Quality is very important
